Task

Activity in my classes Sample page: <https://hdcola.github.io/FSD12Practice/0223/danny/>

1. Create a branch called `classes-activity` for today's exercise.
2. Create a new folder in your repository named `classes-activity`.
3. Create a new file named `index.html` in the `classes-activity` folder.
4. Create a new file named `style.css` in the `classes-activity` folder.
5. Use Inspect Element to see the HTML structure of the sample page.
6. Create the HTML structure of the sample page in the `index.html` file.
7. Use the CSS Flexbox Layout Guide to style the sample page in the `style.css` file.
8. Use Live Preview to see your page in the browser.
9. Use the W3C Web Validator to validate your HTML.
10. Push your changes to your repository.
11. Create a pull request to merge the `classes-activity` branch into the `main` branch.
12. Send the link of the pull request to your mentor.
