

Portfolio

Why you should create a portfolio web page? Because it is a great way to showcase your work and skills to potential employers or clients. It is also a great way to document your journey and progress as a developer. In this exercise, you will create a portfolio web page that showcases your projects and skills.

Bootcamp

Notes

- [How to Host a website on GitHub](#) you can start at 2:35 to skip the intro.

more resources

- [*Responsive Portfolio Website From Scratch](#)
- [*How to put an HTML website online](#) If you want set up a custom domain name and learn more about hosting then watch this video.

Examples

- [John - front-end developer](#) ([source code](#))
- [Sachin - full stack developer](#)
- [Akira - full stack developer](#)
- [Chirag - full stack developer](#)
- [Sean - designer](#)
- [Marc - designer & front-end developer](#)

Task

1. Create a new repository on GitHub called `portfolio`.
2. Create a new file named `index.html` in the root of the repository.
3. Create a new file named `style.css` in the root of the repository.
4. Create a new file named `script.js` in the root of the repository.
5. Put your portfolio content in the `index.html` file.
6. Style your portfolio using the `style.css` file.
7. Add interactivity to your portfolio using the `script.js` file.
8. Create GitHub Pages for your repository.
9. Add the link to your portfolio in the `README.md` file of your repository.

10. Send the repository link to your mentor.
