W3Schools CSS Pseudo-classes Reference https://www.w3schools.com/cssref/css_ref_pseudo_classes.php

## Task

1. Create a branch called `video-menu` for today's exercise.
2. Create a new folder in your repository named `video-menu`.
3. Create a new file named `index.html` in the `video-menu` folder.
4. Create a new file named `style.css` in the `video-menu` folder.
5. Try to mimic the video menu style of the following example page:
   https://hdcola.github.io/FSD12Practice/0302/danny/
6. Use the W3C Web Validator to validate your HTML.
7. Push your changes to your repository.
8. Create a pull request to merge the `video-menu` branch into the `main` branch.
9. Send the link of the pull request to your mentor.
